

# Important Prescription Information

Your doctor has prescribed you the following medication from OSRX

**Prednisolone/Moxifloxacin/Bromfenac**  
Sterile Ophthalmic Solution

*Medication listed above includes USPS  
First-Class Mail Shipping at no added cost.*

## Post-Op Instructions

- For the first 5 days, the metal eye shield should be worn at bedtime. During the first week sunglasses may be worn outside to protect the eye against injury, wind and debris.
- Do not rub the operated eye. Some minor discomfort after surgery is normal. You may use acetaminophen (Tylenol), ibuprofen (Motrin or Advil), or Aspirin for this discomfort.
- For the first three (3) days, you may shower from the neck down, avoiding direct water from splashing into the operative eye. Do not lift more than 20-30lbs. or do vigorous exercise. Assuming vision has returned to the operated eye, and/or if the vision is good in the non-operated eye, you may drive after 3-7 days.
- Avoid wearing makeup for the first five days after surgery.

**If you should experience significant pain, common nausea or sudden loss of vision, call the doctor's office immediately at 708-873-0088.**
